

TOGETHER FOR RARE™

Patient Affairs Liaisons SERVING RARE COMMUNITIES

The Pfizer Patient Affairs Liaisons (PALs) support people living with some rare diseases. PALs can also offer support to caregivers in these communities. Each PAL covers a specific geographic area. Across the United States, they help provide compassion, connection, and commitment to rare disease communities.

How PALs may help

- Understand the needs of rare disease community members
- Meet with patients and caregivers to educate and answer questions about Pfizer Rare Disease programs and resources
- Connect those touched by a rare disease with patient advocacy groups
- Guide patients in finding services related to:
 - A new diagnosis
 - Creating connections in the rare disease community
 - Moving from childhood medical care to adult care

PALs help support caregivers, families, and people diagnosed with:

Acromegaly

Transthyretin amyloid
cardiomyopathy
(ATTR-CM)

Growth hormone
deficiency

Hemophilia

Sickle cell

Type 1 Gaucher
disease

What PALs can do

- Connect those affected by some rare conditions with programs and educational information
- Work with patients and advocacy groups to better understand the needs of rare disease communities
- Offer information on Pfizer programs

PALs cannot

- Provide medical advice
- Proactively reach out to individual patients or caregivers
- Share patient/caregiver personal or contact information in order to promote Pfizer products
