

**TOGETHER  
FOR RARE™**

**PFIZER PATIENT ENGAGEMENT  
SERVING RARE  
COMMUNITIES**

The Pfizer Patient Engagement Team supports people living with certain rare diseases. Patient Engagement can also offer support to caregivers in these communities. Team members cover specific geographic areas. They help provide compassion, connection, and commitment to rare disease communities across the United States.

### Roles of the Patient Engagement Team

- Understand the needs of rare disease community members
- Meet with patients and caregivers to educate and answer questions about Pfizer Rare Disease programs and resources
- Connect those touched by a rare disease with patient advocacy groups
- Guide patients in finding services related to:
  - A new diagnosis
  - Creating connections in the rare disease community
  - Moving from childhood medical care to adult care

### The Patient Engagement Team helps support caregivers, families, and people diagnosed with:

Acromegaly

Transthyretin cardiac amyloidosis (ATTR-CM)

Growth hormone deficiency

Hemophilia

Sickle cell

Type 1 Gaucher disease

### Patient Engagement can

- Connect those affected by certain rare conditions with programs and educational information
- Work with patients and advocacy groups to better understand the needs of rare disease communities
- Offer information on Pfizer programs

### Patient Engagement cannot

- Provide medical advice
- Proactively reach out to individual patients or caregivers
- Share patient/caregiver personal or contact information in order to promote Pfizer products
